

You will need to repeat the pattern five times for a total of 80 stitches

Cast on 80 stitches. Do a rib (knit two, purl two) stitich to make a brim. The number of rows you do depends on how large you want to make it. I did 11 rows

Knit one row of your main color. Then start using the pattern. One again, you will need to repeat the pattern five times.

Once you finish row 25 go back to using only the main color. Start decreasing however you like. I stitched two together at the start of each pattern repeat.
